Seamos Diferentes y Lancémonos juntos por tus ideas
En Bci queremos invitar a todos los emprendedores a que seamos diferentes.
Banco de Crédito e Inversiones (BCI) was founded on June 10th, 1937

Established as a banking corporation, from its beginnings the main objective was to attend to the productive sector of the country, focusing mainly on small business and family work. Since the Bank went public, it has been characterized by its ongoing quality of service, innovative spirit, and a determined purpose to attend to the different segments of the economy. This orientation was one of the starting pillars of the Bank, and the approach of its first Board of Directors, of which Juan Yarur Lolas and other prominent entrepreneurs of the time were members.
