

Initiative featured at the RIAC's Report developed to support countries' efforts to mitigate Covid-19's impact

Covid-19 Quick Diagnostic Tests and Non-Invasive Ventilators

CIBNOR

Mexico

Source: Dr. Luis Felipe Beltrán-Morales, IP and Tech Commercialization Coordinator, RIAC Partner

The Center of Biologic Research of Northeast (CIBNOR) is working in five projects to help mitigate the Covid-19 pandemic. The projects include (i) quick low-cost diagnostic test; (ii) non-invasive ventilators; (iii) in-vitro probes to boost the immune system; (iv) environmental research to identify virus presence in the air; and (v) agro technologies to support rural economies.

Research is conducted in labs following biosecurity standards by highly qualified interdisciplinary teams. The quick diagnostic tests comply with the diagnostic standards of the World Health Organization (WHO).

What support does the initiative needs?

CIBNOR is in need of supply of chemical reagents to advance the project on diagnostic tests
